Created new application flight reservation system

EXP NO 2: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PROPERTY BUYING & RENTAL PROCESS (IN CHENNAI CITY) USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

DATE: 13/07/2026

AIM: To Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

step1: Go to zoho.com.

step 2: Log into the zoho.com.

step 3: Select one application step.

step4: Enter application name as property buying & rental.

step 5: Created new application as property buying & rental.

step 6: Select one form

step 7: The software has been created.

IMPLEMENTATION:

The screenshot shows the Zoho Creator interface for an application named 'Property Buying & Rental SaaS'. The left sidebar contains a menu with options: owner, owner Report, Properties Form, Clients, Inquiries, deal, and admin dashboard. The 'owner' option is selected. The main area displays the 'owner' form with fields for OwnerName, Email, Phone (with a country code dropdown set to +91 and a value of 81234 56789), Address (split into Address Line 1 and Address Line 2), City / District, State / Province (a dropdown menu), Postal Code, and Country.

The screenshot shows the Zoho Creator interface for the same application, but with the 'Properties Form' selected in the sidebar. The main area displays the 'Properties Form' with fields for title, owner (a dropdown menu), PropertyType (a dropdown menu), BHK (a dropdown menu), furnishing (a dropdown menu), BuiltUpAreaSqft (a text field with a placeholder '#####'), and Address (split into Address Line 1 and Address Line 2).

step 6: Select one form

step 7: The software has been created.

IMPLEMENTATION:

The image displays two screenshots of a web application titled "Library Book Reservation".

The top screenshot shows the "Reservation Tracking" form. It includes input fields for "Book", "Reserver Name", "Reservation Date" (with a date picker), "Due Date" (with a date picker), "Return Date" (with a date picker), and a dropdown for "Reservation Status". There are "Submit" and "Reset" buttons at the bottom.

The bottom screenshot shows the main dashboard. It features a sidebar menu with options: "Dashboard", "Reservation Track...", "Board", "Book Information", "Copy Availability", and "Rack Location". The main content area displays several summary cards: "Sum () Total Copies", "Ct () Count of Reservation Tracking", "Ct () Count of Book Information", and "Ct () Count of Copy Availability". Below these are charts for "Current Books by Capacity" (Scatter - Rack Location) and "Section by Current Books" (Bar - Rack Location). A "Reservation Tracking Report" table is visible at the bottom. On the right, there is a "Page Customization - Web" panel with options for "Display as" (Card, Plain) and "Margin" settings.
